

PLANTING INSTRUCTIONS

Borage

Bees love borage flowers, and as a self-seeding annual, you will too. These plants easy to grow and will come back year after year. Borage grows to a height of 18-30".

Direct seed or transplant to 12" between each plant. Sun to part shade, sow in Spring. Takes 7-14 days to germinate.

Purple flower has a mild cucumber flavor and can be used to garnished salads or cold drinks. Long blooming period.
